

# Wireless Trucking

## Table of contents

Acronyms.....	5
Scope .....	6
Methodology .....	6
Executive summary.....	6
1.0 Introduction .....	11
1.1 North American trucking industry: trends, opportunities, and challenges .....	11
1.2 Overview of trucking applications.....	13
1.3 Need for wireless technologies - competitiveness and costs.....	15
1.3.1 Truckload .....	17
1.3.2 Less than truckload (LTL).....	18
1.3.3 Small package carriers .....	18
1.3.4 Private fleet .....	19
2.0 Integrated wireless trucking solution - Telematics .....	20
2.1 Key modules.....	21
2.2 Key market drivers in telematics .....	24
2.3 Key challenges .....	25
2.4 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and payback period.....	26
2.4.1 Case study 1: Ryder saves fuel cost by 10-15% and one hour per driver per day ....	27
2.5 Benchmarking vendors.....	27
3.0 Track and trace solutions .....	30
3.1 Overview of track and trace .....	30
3.2 Key trends in track and trace solution: value chain.....	31
3.2.1 GPS tracking technology .....	35
3.2.2 Wireless solution for Track and Trace.....	37
3.3 Key buying criteria matrix (accuracy, reporting vs. monitoring, coverage, frequency, cost) .....	38
3.4 Benchmarking solutions implementation in NA trucking industry .....	40
3.5 Case Studies .....	41
3.5.1 Crown launches InfoLink for fleet management of lift trucks .....	41
3.6.2 Knight Transportation saved US\$1 million implementing track and trace solution.....	44
3.6.3 More than \$20 savings on fuel using In-Cab Fuel Services from QUALCOMM.....	45
3.6 Benchmarking Vendors .....	46
4.0 Improving driver communication.....	51
4.1 Overview of driver communication .....	51
4.2 Key trends in driver communication solution: value chain .....	52
4.3 Key buying criteria matrix (accuracy, reporting vs. monitoring, coverage, frequency, cost) .....	54
4.4 Case Studies.....	56
4.4.1 Case study 1 - AAA Cooper.....	56

4.4.2 Case study 2 – R&L Carriers .....58

4.5 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and payback period..... 60

4.6 Benchmarking vendors..... 60

5.0 Route and schedule optimization solutions.....63

5.1 Overview of route and schedule optimization..... 63

5.2 Key trends in route and schedule optimisation solution: value chain ..... 63

5.2.1 GPS based handheld devices ..... 64

5.2.2 Pick-up and delivery ..... 64

5.2.3 Integration to be a vital aspect of wireless routing and schedule optimization.....64

5.3 Key buying criteria matrix ..... 64

5.4 Benchmarking solutions implementation in NA trucking industry ..... 66

5.5 Case study ..... 67

5.5.1 Case study 1: Arctic Glacier, Inc.....67

5.6 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and payback period..... 68

5.7 Benchmarking vendors..... 68

6.0 POD and mobile imaging ..... 70

6.1 Overview of POD and mobile imaging ..... 70

6.2 Key trends in POD and mobile imaging solution: value chain..... 70

6.2.1 POD ..... 71

6.2.2 Mobile imaging ..... 72

6.2.3 Imagers: Important technical features and capabilities ..... 72

6.3 Key buying criteria matrix ..... 73

6.4 Case Study..... 74

6.4.1 Case study 1: Physician sales & service.....74

6.4.2 Case study 2: Gateway delivery ..... 75

6.5 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and Payback period ..... 75

6.6 Benchmarking vendors..... 77

7.0 Security Solutions ..... 78

7.1 Overview of security solutions ..... 78

7.2 Key trends in security solution: value chain ..... 79

7.3 Benefits/competitive advantage analysis ..... 84

7.4 Benchmarking solutions implementation in NA trucking industry ..... 84

7.5 Case studies ..... 85

7.6 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and payback period..... 86

7.7 Benchmarking vendors..... 87

8.0 Optimizing yard and dock solutions.....89

8.1 Overview of yard and dock solutions ..... 89

8.2 Key Trends in Yard and Dock management solutions..... 89

8.2.1 Yard management.....	90
8.2.2 GPS aids yard management.....	91
8.2.3 RFID to become preferred solution for yard management .....	91
8.2.4 Dock management .....	91
8.3 Key buying criteria matrix .....	93
8.4 Case study .....	94
8.4.1 Case study 1: OldDominion Freight Lines.....	94
8.4.2 Case study 2: NYK logistics.....	95
8.5 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and payback period.....	96
8.6 Benchmarking vendors.....	98
9.0 Monitoring, reporting and diagnostic solutions.....	99
9.1 Overview of monitoring, reporting and diagnostic.....	99
9.2 Key trends in monitoring, reporting and diagnostics solution: value chain.....	100
9.3 Key buying criteria matrix (accuracy, reporting vs. monitoring, coverage, frequency, cost) .....	100
9.4 Benefits/competitive advantage analysis .....	100
9.4.1 Benchmarking solutions implementation in NA trucking industry .....	101
9.5 Listing solutions by trucking industries .....	102
9.5.1 Raider Express attains operational efficiency with Terion FleetView 3R .....	102
9.6 Economics of solution: start up cost, running cost, operational savings, savings from better asset utilization, ROI and payback period.....	102
9.7 Benchmarking vendors.....	103
10.0 Conclusion .....	108
